Dear Recruiting Manager,

I am sending my resume in response to your recent post for a Software Engineer to join your team at Dell. After reading the job description I am confident that I would be a perfect fit for this position as my experience and abilities precisely match your requirements.

I have obtained a Master's degree in Computer Science from Syracuse University in May, 2018. I am proficient in Core Java, J2EE, SQL, JavaScript, HTML, networking and have learned extensively with other programming languages, such as C++, C# and web programming. I am not afraid being challenged and engaging with projects that require me to work outside my knowledge set, as continuing to learn new languages and development techniques.

Your listed requirements closely match my background and skills and I would like to offer the following highlights that would enable me to contribute to your bottom line:

- Highly skilled in designing, testing, developing troubleshooting, data structures and algorithms.
- Having an approachable and professional manner at all times.
- Keep good style of work as earnestness, diligent and motivation.
- Continuously striving to improve all practices, routines and skills.

A copy of my resume is enclosed for your reference. I would welcome an opportunity to discuss my qualifications with you at your earliest convenience. I can be reached at 315-949-8356 or via email at jchen74@syr.edu. Thank you very much for your time and consideration.

Yours sincerely

Jiecheng Chen
